NEET PG Syllabus 2026

Detailed Subject- Wise Topics

Aspiring doctors who wish to pursue PG courses in India have to qualify the NEET PG exam. It is a national level entrance examination conducted by NBE (National Board of Examinations) for admission to various MD/MS and PG Diploma Courses. The NEET PG syllabus covers all the topics from the undergraduate MBBS course as prescribed by MCI (Medical Council of India).

If you are looking for a detailed NEET PG exam syllabus for PG 2026 then we have got you covered. In this article, we have provided the complete syllabus for the upcoming exam so that you can start your preparation accordingly. We have also included a few tips to help you ace the exam. So, go through the syllabus carefully and start preparing for the exam now!

NEET PG Syllabus

Candidates who wish to pursue postgraduate medical courses (MD/MS/PG Diploma) in government or private medical colleges of India must prepare thoroughly for the [NEET PG exam](#). And the first step of preparing for any exam is knowing the exam syllabus.

The NEET-PG syllabus covers all the topics taught during the MBBS course and is divided into preclinical, para-clinical and clinical subjects. The division of the same is as follows-

Pre-clinical Subjects	Para-Clinical Subjects	Clinical Subjects
Anatomy	Pharmacology	Medicine, Dermatology and Venereology
Physiology	Microbiology	Surgery, Orthopaedics and Anaesthesia
Biochemistry	Pathology	Radiodiagnosis
Forensic Medicine	Obstetrics and Gynaecology	
Social and Preventive Medicine	Pediatrics	
Ophthalmology		
ENT		
Psychiatry		

Each section of the NEET-PG syllabus contains a number of topics, which are further divided into

Subject	Topic	Sub-Topic
NEET PG Exam Syllabus for Anatomy	General Embryology	- Developmental Timeline Gametogenesis - Gametogenesis 2 - Developmental period: Week 1 & 2 - Developmental period: Week 3 & 4 - Germ layer derivatives - Ectoderm and neural crest cells derivatives - Mesoderm derivative - Endoderm derivatives Placenta formation
	Histology	Body tubes Epithelial tissue - Glands Connective tissue - Cartilage tissue Lymphoid tissue - Integumentary system - Cell junctions - Muscular tissue Respiratory system Digestive system Urinary system - Genital system
	Osteology and Arthrology	- Osteology - Arthrology

		• Third ventricle • Fourth ventricle • White matter (Types of fibers) • Neural columns • Cerebrum • Basal ganglia • Internal capsule • Thalamus and hypothalamus • Brainstem and cranial nerve nuclei • Neural columns and brain stem nuclei • Cerebellum • Spinal cord • Autonomic nervous system • Arterial nervous system • Arterial supply of brain • Brainstem lesions • Venous drainage of cranial cavity
	Head and Neck	• Pharyngeal arches • Pharyngeal pouches & clefts • Tongue development • Pharyngeal arch arteries • Development of skull • Cranial cavity • Cranial cavity- II (Cranial fossae and related foramina) • Cranial activity - IV (Posterior cranial fossa) • Trigeminal nerve • Cavernous sinus • Facial nerve • Glossopharyngeal nerve • Vagus nerve

		• Scalenus anterior muscle: Relations • Head and neck: Arterial supply • Head and neck: Venous drainage • Head and neck: Lymphatic drainage • Scalp • Neck triangles • Neck fascia and spaces: Revision • Parotid gland • Pharynx • Oesophagus • Larynx • Vertebral landmarks • Ear • Eyeball • Cranial nerve: 3,4 and 6
	Back region	• Spinal cord termination • Spinal cord: enlargements and spaces • Vertebrae • Lumbar puncture • Vertebral curvatures and slip disc • Cranio-vertebral joints • Vertebral landmarks and triangles
	Thorax	• Development: Cardiovascular system • Development: Embryonic veins • Development: Heart tube • Development: Heart tube and transverse pericardial sinus • Development: Interatrial septum • Development: AP septum formation and anomalies

		- Heart: Interior - Heart: Arterial supply - Sternal angle and mediastinum - Lungs: Hilum - Lungs: Bronchopulmonary segments - Lungs: Pleura - surface markings Joints - Respiratory movements - Intercostal drainage and block - Phrenic nerve Venous drainage - Lymphatic drainage
	Upper Limb	- Embryology - Nerve supply (overview) - Dermatomes and myotomes Brachial plexus - I (Trunks) Brachial plexus - II (Cords) - Bones and muscles (proximal region) - Axilla - Scapular movements - Clavipectoral fascia - Muscles of anterior arm region - Muscles of anterior forearm region - Cubital fossa - Carpal and metacarpal bones Muscles of hand - Posterior forearm muscles - Anatomical snuffbox - Nerve supply: anterior forearm and hand muscle Median nerve lesions

		• Nerve lesions: Comparative analysis • Arterial supply • Venous drainage • Lymphatic drainage • Hand spaces
	Abdomen	• Umbilical cord contents and anomalies • Diaphragm: development and openings • Development of mesentery and pancreas • Gut rotation • Abdominal planes • Neurovascular bundles • Liver • Inguinal and femoral region and associated herniae • Peritoneal cavity: sacs and spaces • Abdomen: Arterial supply • Stomach • Small intestine: Duodenum • Small intestine: Biliary apparatus • Small intestine: jejunum and Ileum • Large intestine • Pancreas • Kidney • Ureter • Venous drainage of abdomen and thorax
	Pelvis and Perineum	• Perineal pouches and ischiorectal fossa • Development of genito-urinary system • Pelvis and perineum • Prostate gland and parts of male urethra • Pelvic diaphragm

		• Pudendal nerve • Pelvis & perineum: nerve supply • Pelvis & perineum: Arterial supply • Female reproductive system • Rectum and anal canal
	Lower Limb	• Nerve supply - overview • Muscles of proximal region (hip and knee joints) • Nerve supply thigh muscles • Movement and associated muscles: Hip and knee joints • Muscles and gluteal region • Hybrid muscles • Popliteus • Knee joint • Adductor canal • Popliteal fossa • Leg muscles • Leg and foot region: nerve supply • Flexor retinaculum • Plantar arches • Sole muscles • Arterial supply • Venous drainage
Physiology	Orient Next Physiology	• Orient Next Physiology
	General Physiology	• General Physiology • Concepts in Physiology • Cell membrane and transport proteins • Transport process

Nerve Muscle Physiology	• Membrane potential • Excitation and action potential • Nerve • Muscle -I • Muscle - II • Sarcomere • Smooth muscle
Blood Physiology	• Blood physiology
Gastrointestinal system	• Gastrointestinal tract
Cardiovascular System	• Conducting system of the heart • ECG • Cardiac cycle - 1 • Cardiac cycle - 2 • Cardiac output • Circulation Part- 1 • Circulation Part -2
Respiratory System	• Introduction: Respiratory System • Respiratory System Part - 1 • Respiratory System Part - 2 • Respiratory System Part - 3 • Respiratory System Part - 4
Excretory System	• Renal physiology glomerular function • Excretory system (kidney, bladder) Acid base balance

		• Male reproductive system • Female reproductive system
	The Nervous System	• Introduction to central nervous system • Sensory system • Motor system part - 1 • Motor system part - 2 • Physiology of pain • Higher functions • Autonomic nervous system
	Special Senses	• Special senses Part - 1 • Special senses Part - 2
Biochemistry	Concepts	• Four formulas • How to use formulas • cAMP and cGMP • Sources of blood glucose • Fuel in fed, fasting and starvation • Fasting state • Acetyl CoA • Diabetes • Respiratory quotient • Cell organelles • Basics of carbohydrate and enzymes • High energy compounds

	Carbohydrate chemistry	- Basics of carbohydrate chemistry - Isomerism - Classification of carbohydrate - Mucopolysaccharidosis - Beta Galactosidase - Glucose transporters
	Carbohydrate Metabolism	- Glycolysis - Arsenic - Link reaction - TCA cycle - Pasteur's and warburg effects - NADH shuttles - ETC - Gluconeogenesis - Reciprocal regulation - TIGAR - Glycogen metabolism - Glycogen storage diseases - Glycogen regulation - HMP - Uronic acid pathway - Galactose metabolism - Fructose metabolism - Sorbitol pathway
	Enzymes	- Enzyme basics - Cofactors - Isoenzymes - Enzyme classification - Enzyme kinetics

		Enzyme regulation
	Amino acids and proteins	- Amino acids: basics - Classification and metabolism of amino acids - Glycine metabolism - Phenylalanine and tyrosine metabolism - Tryptophan metabolism - Methionine and cysteine metabolism - Catabolism of amino acids - Transamination - Hyperammonemia - Urea cycle - Urea cycle disorders - Nitric oxide - Protein bonds and structure - Protein Precipitation - Color reactions of amino acids and proteins - Chromatography and electrophoresis - Fibrous proteins - Haem synthesis - Porphyria - Haem catabolism - Chaperones
	Lipids	- Lipid chemistry - Sphingolipidoses - PUFAs - Lipoproteins - HDL - Lipotropic factors - Fatty acid synthesis

		Bile acids
	Molecular Biology	- Nucleotides - Basics of genetics - Genetic disorders - Mitochondrial DNA - DNA replication - Klenow fragment - DNA repair - Types of RNAs - Introns - Transcription - Post transcriptional modifications - Ribozyme - Operon model - Codon - Translation - Genetic techniques - Epigenetics and genomic imprinting - CRISPR
	Miscellaneous	- Alcohol metabolism - Vitamins general - Vitamin A - Vitamin D - Vitamin E - Vitamin K - Vitamin B1 - Vitamin B2 - Vitamin B3 - Vitamin B5

		• Vitamin B9 • Vitamin B12 • Vitamin C • Minerals-basics • Calcium • Iron • Copper • Menke and wilson disease • Selenium and fluorine • Zinc and chromium • Free radicals • Xenobiotics • Muscle energy systems • Meister cycle • Buffers and titration curve • Polyamine pathway • HbA1C • 1 carbon metabolism
Pathology	Cell Injury	• Concepts of cell injury • Cellular adaptation • Irreversible injury 1 • Irreversible injury 2 • Free radical injury • Ferroptosis • Pigmentation
	Inflammation	• Introduction to inflammation and vascular changes • Intravascular cellular changes • Extravascular cellular changes • Oxygen dependent and independent bacteria

		- Freshly formed chemical mediators - Plasma chemical mediators - Coagulation cascade - Chronic inflammation and wound healing
	Immunity 1	- Basics of immune system activation - Hypersensitivity reactions I to IV - Major histocompatibility complex
	Immunity 2	- Concept of tolerance and basics of autoimmune disorder - Autoimmune disorders 1: SLE - Autoimmune disorders 2 - Concepts of organ transplant - Immunodeficiency disorders - Amyloidosis
	Genetics	- Introduction: genetics - Single gene disorder - Non-classical inheritance disorders - Specific cytogenetic disorders
	Hematology: Red Blood Cells	- Hematopoiesis: basic concepts - RBC development and classification of anemias - Microcytic Anemias 1 - Microcytic Anemias 2 - Hereditary spherocytosis and G6PD deficiency - Basic concepts of hemolytic anemias - Hemoglobinopathies : sickle cell anemia and thalassemia

		• Paroxysmal nocturnal hemoglobinuria
	Hematology: White Blood Cells	• Introduction to WBC disorders • Acute leukemias: ALL and AML • Chronic myeloid leukemia • Myeloid disorders • Lymphomas: HL and NHL • Plasma cell dyscrasias • Plasma cell disorders • Waldenstrom's disease and heavy chain disorders
	Platelets and Blood Transfusion	• Concepts of bleeding disorders • Introduction to platelet disorders • Angiopathic hemolytic anemia: basic concepts • Clotting factor disorders and concept of factor inhibitors • Von willebrand disease • Blood transfusion and blood grouping • Platelet disorders
	Gastrointestinal Tract	• Carcinoid tumor • Introduction to GIT • Inflammatory bowel disease • Stomach basics gastritis and gastropathy • Peptic ulcer disease • Acute and chronic gastritis • Small intestine malabsorption disorders • Intestinal polyps and colon cancer • Gastric tumors • Alcohol induced esophageal disorders and achalasia cardia

	• Congenital GIT Anomalies • GIT disorders 1 • GIT disorders 2 • GIT disorders 3
Respiratory System	• Obstructive lung disorder • Restrictive lung disorder • Pulmonary hypertension • Infective lung disorders • Pulmonary tuberculosis • Pneumoconiosis • Miscellaneous topics: ARDS • Neonatal respiratory distress syndrome • Lung tumors • Lung abscess
Breast	• Breast disorders
Bone Disorders	• Bone tumors
Neoplasia	• Basic concepts of neoplasia • Genetic basis of carcinogenesis - 1 • Genetic basis of carcinogenesis - 1 • Cancer genes • Etiological factors of neoplasia • Diagnosis of cancers • Liquid Biopsy • Paraneoplastic syndromes

	CVS, Blood Vessels and Vasculitis	- Vasculitis - Ischemic heart disease - Rheumatic fever and infective endocarditis - Cardiac tumors
	Kidney and Urinary Bladder	- Congenital renal disorders - Glomerular disorders 1: nephritic disorders - Hereditary nephritis - Glomerular disorders 2: nephrotic disorders - Renal stones - Renal tumors
	Liver, Biliary System and Pancreas	- Liver disorders 1 - Liver disorders 2
	Genital System	- Male genital tract disorder 1 - Male genital tract disorder 2 - Female genital tract disorder 1 - Female genital tract disorder 2 - Female genital tract disorder 3
	Endocrinology	- Parathyroid and thyroid disorders - Adrenal gland disorders
	Central Nervous System	- CNS disorders 1 - CNS disorders 2 - Meningitis
Pharmacology	Covid- 19	- Drug update for Covid-19 - Covid-19

General Pharmacology

- Pharmacokinetics (Absorption)
- Pharmacokinetics (Distribution)
- Pharmacokinetics (Metabolism)
- Pharmacokinetics (Excretion and calculations)
- Pharmacodynamics
- Pharmacogenetics
- Therapeutic drug monitoring
- Clinical trials
- Plasma conc VS Time graph
- Steady state
- Numericals in pharmacology
- ADR and pharmacovigilance
- Drugs in pregnancy and lactation
- Drugs antagonism
- Combined effect of drugs
- Practicals in general pharmacology
- Details of enzymatic receptors (Higher order topic)
- Spare receptors
- Receptor regulation
- Drugs with peculiar names
- Types of enzyme inhibitors
- Prescription
- Hereditary angioneurotic edema
- Different named receptors

Autonomic Nervous System

- Cholinergic drugs
- Anti-cholinergic drugs
- Adrenergic drugs
- Anti adrenergic drugs
- Tertiary and quaternary amines

		- Bladder pharmacology Glaucoma
	Cardiovascular System	Congestive heart failures - Ischemic heart disease (Angina and MI) - Hypertension - Arrhythmias - Dyslipidemia - Pulmonary hypertension - Management of shock
	Kidney	Diuretics
	Respiratory System	Drugs for cough and bronchial asthma
	Gastro-Intestinal Tract	- Drugs for peptic ulcer - Laxative purgatives - Vomiting Diarrhea and inflammatory bowel syndrome
	Endocrine System	- Pituitary hypothalamic system - Thyroid - Pancreas - Adrenal - Osteoporosis - Sex hormones - Oral contraceptives - Bromocriptine in diabetes mellitus (Higher order topic)
	Central Nervous System	Sedative hypnotics

	• Psychiatric illness • Drugs of abuse (Opioids and alcohols)
Hematology	• Drugs affecting blood flow • Drugs affecting cells of blood
Antimicrobial Drugs	• Cell wall synthesis inhibitors • Protein synthesis inhibitors • Antimetabolites and quinolones • Drugs not effective against certain bacteria • Pseudomembranous colitis • TDK CDK and PAE • Antimicrobial resistance • Mycobacterial diseases (TB, Leprosy and MAC) • Antiviral drugs • Antifungal drugs • Topical antifungal drugs • Anti parasitic drugs • Antimicrobial agents
Anticancer and Immunosuppressants	• Monoclonal antibodies • Cytotoxic anticancer drugs • Targeted anticancer drugs and immunosuppressants
Autacoids	• Histamine and 5-HT • Migraine • PGs, LTs and NSAIDs • Gout and Rheumatoid Arthritis

Microbiology	Anesthesia	- Local anesthesia - Skeletal muscle relaxants - General anesthesia
	Miscellaneous	- Chelating agents - Hyperkalemia
	Covid - 19	Covid-19
	Introduction	Introduction to microbiology
	Systematic Bacteriology	- Systematic Bacteriology Part -1 (Gram positive, Cocci, Gram negative cocci) - Systematic Bacteriology Gram Positive Bacilli (part-1) - Systematic Bacteriology Gram Positive Bacilli (part-2) - Systematic Bacteriology (enterobacteriaceae, E.coli, klebsiella, proteus, salmonella, shigella, pseudomonas, vibrio) - Systematic Bacteriology Gram Negative Bacilli (haemophilus, HACEK, bordetella, brucella, yersinia, legionella, spirochetes) - Systematic Bacteriology gram negative bacilli (lepto spira, L. interrogans, rickettsiae, scrub, typhus, Q fever, ehrlichia, bartonella, chlamydiae, campylobacter, helicobacter, mycoplasma, bacteroids)
	Mycology	Mycology
	Parasitology	- Parasitology part - 1 (Protozoology) - Parasitology part - 2 (Helminthology)

		• Virology and bacteriology must know updates	
	Immunology	• Immunology part -1 • Immunology part -2 • Immunology part - 3	
	General Microbiology	• General Microbiology part - 1 • General Microbiology part - 2 • General Microbiology part -3	
	System Wise & NEXT Based Clinical Microbiology	• Normal microbial flora • Bone and joint infection • GIT infections • Urinary tract infection • Pelvic infections • Cardiac infections • Upper respiratory tract infections • Lower respiratory tract infections • Central nervous system infections • Bloodstream infections • Fever of unknown origin • Anemia causing organisms • Eye and ear infections • Skin lesions • Random skin lesion images • Nosocomial infections • Hand hygiene • Organisms transmitted by droplet and aerosol • Biosafety levels • Occupational exposures (HIV and HBV) • BMW management	

PSM	COVID-19	• Basic steps of donning and doffing PPE • Black fungus Mucormycosis • Covid -19 Biomedical waste management • Covid-19 Vaccines
	Recent updates 2021	• New updated values criteria definitions 2021-22
	Epidemiology	• Definitions and concepts • Classification, cohort study • Case control study, combined designs • Other analytical studies • Confounding and bias • RCT, trials • EBM, Meta-analysis, other studies • Meta-analysis • Forest plot • Funnel plot • Disease causation, measurements, milestones
	Vaccines and Cold Chain	• Concepts of immunity, classification of vaccines • National immunization schedule 2020-21 • Contraindications, AEFIs • Cold chain in India • Important facts in immunization
	Health and Disease	• PQLI, HDI, MDPI, BPL • Time distribution, epidemics • Elimination, eradication, surveillance • Levels of prevention of disease

	Screening of Disease	• Definition and concepts, examples from NHPs • Sensitivity, specificity, PPV, NPV • ROC curve, precision & accuracy • Likelihood ratios
	Demography	• Definition and concepts • Census, SRS, NFHS, DLHS, VRS • Other key concepts
	Preventive Obstetrics, Pediatrics and Geriatrics	• Obstetric care in RCH: visits, IFA, TT, MCH indicators • Pediatric care in RCH: BW, BL, PEM, breast feeding • Growth and development • School health, geriatrics
	Nutrition and Health	• Nutrition guidelines 2021-22 • Definition and concepts • Proteins, fats, rich sources • RDA, nutritional requirements • Vitamins and nutritional deficiencies • Food standards, food adulteration
	Social Sciences and Health	• Definition and concepts in sociology & psychology • Family systems in India • Socio-economic status, Social security • Health economics
	Environment and health	• Water • Air, light, sound, housing, radiation, waste disposal

	International Health	• International health agencies • Bioterrorism agents • Sustainable development goals • Biosafety levels
	Health Education and Communication	• Definitions and concepts • HC methods, D-P communication • Health education, mass media • National education policy 2020
	Health Care in India	• PH care, elements & principles • Rural and urban health centers, workers, norms • AYUSH, socialized medicine
	Family Planning and Contraception	• Definitions and concepts • Natural methods, barrier methods, IUSs, OCPs • Other FP methods • New initiatives in family planning
	Communicable and Non-Communicable Disease	• General epidemiology • Respiratory infections • Intestinal infections, worm infections • VBDs, arboviral & viral infections, surface infections • Leprosy, HIV & STDs • Other communicable diseases • NCDs: CHD, HTN, DM, RF, Cancers, Obesity, Blindness
	National Health Programmes, Policies and	• National Tuberculosis elimination program 2020-21

		• NPCBVI, NACP • NVBDCP, NLEP • Other NHPs • New national health programs in India • National digital health mission • Health schemes • New schemes strategies initiatives 2021-22 • Health policies & legislations
	Allied Health Disciplines	• Biomedical waste management • Disaster management • Occupational health • Genetics and health • Mental health
	Health Planning and Management	• Definitions and concepts in HP • HP committees • National health policy 2017 • HM techniques, inventory control
	Biostatistics	• Variables, scales • Central tendency, dispersion • Normal distribution, skewed distributions • Statistical errors, p-value, confidence intervals • Statistical tests • Statistical graphs, correlation, regression, locations • Sampling, sample size • Probability & odds • Tree diagram • Box and whisker plot

	Clinical Essentials	• How to give intramuscular injections • How to give intradermal injections • How to give subcutaneous injections
ENT	Ear	• Fundamentals of ear (Osteology and Embryology) • Anatomy of external ear • Diseases of external ear • Anatomy of middle ear cleft • Eustachian tube (Anatomy, physiology and diagnostic tests) • Anatomy of inner ear • Neural pathway of sound • Physiology of hearing • Tests of hearing • Facial nerve and its disorders • Otitis media • Complications of otitis media • Otosclerosis • Glomus tumor • Diseases of inner ear • Anatomy and diseases of CP angle • Hearing devices • Vestibular Schwannoma
	Nose and Paranasal Sinuses	• Congenital lesions of nose • CSF rhinorrhoea • Fungal rhinosinusitis • X-rays of paranasal sinuses • Rhinosinusitis • Nasal disorders of atrophy • Embryology of nose and face

		• Blood supply of nasal septum and epistaxis • Paranasal sinuses anatomy • Tumors of nose and paranasal sinuses • Anatomy of nasal cavity • Anatomy and disorders of external nose • Complications of sinusitis • Nasal septal disorders • Nasal polyps • Physiology of nose
	Pharynx	• Introduction to pharynx • Nasopharynx • Hypopharynx • Oropharynx • Layers of cervical fascia • Deep neck spaces
	Larynx	• Embryology of larynx • Structural anatomy of larynx • Acute and chronic inflammation of larynx • Benign lesions of larynx • Vocal fold palsy • Carcinoma larynx
	Clinical Essentials	• Maneuver for diagnosis and treatment of BPPV • ENT examination by head mirror • Anterior rhinoscopy • Posterior rhinoscopy • Indirect laryngoscopy

	Introduction to Ophthalmology	Introduction to Ophthalmology
	Basics of Ophthalmology	- Basics of Ophthalmology Part- I - Basics of Ophthalmology Part - II - Embryology of the eye
	Orbit and Adnexa	- Orbit and adnexa - Lacrimal apparatus
	Lens and Cataract	- Cataract part - 1 - Cataract part - 2
	Uveitis	Uveitis
	Glaucoma	- Glaucoma Part 2 - Glaucoma Part 3 - Glaucoma Part 1
	Refraction	- Refraction part 1 - Refraction part 2
	Retina and Vitreous	- Retina and Vitreous Part 1 - Retina and Vitreous Part 2 - Retina and Vitreous Part 3 - Hypertensive retinopathy
	Neuro Ophthalmology	Neuro Ophthalmology Part 1 Neuro Ophthalmology Part 2
	Squint / Strabismus	Squint and Strabismus Part 1

	Conjunctiva	Conjunctiva
	Cornea	• Cornea Part 1 • Cornea Part 2
	Sclera	Episcleritis and devastating scleritis
	Trauma	• Ocular trauma • Chemical injuries
	Imaging in Ophthalmology	Imaging in ophthalmology
	Lasers in Ophthalmology	Lasers in Ophthalmology
Gynaecology & Obstetrics	Gynecology	• Mensuration • Menstrual problems in young and small girls • Ovarian hyperstimulation syndrome (Bakers dozen) • Tests of ovulation • Endometriosis adenomyosis • Hormonal replacement therapy (Sweet-sixty-sixteen) • Ovarian tumors • Polycystic ovarian syndrome • Cervical carcinoma • Post menopausal bleeding • Vulvar carcinoma • Fibroids • Hysterectomy • Mullerian abnormalities • Abnormal uterine bleeding (It's a downpour!) • Gametogenesis • Intersex (She is your brother!)

		• Genital organ prolapse • Urinary fistula in obstetrics • Emergency contraceptives • Contraception • Genital tract infection • Amenorrhea • Clinical anatomy of female reproductive tract • Endometrial carcinoma
	Obstetrics	• Covid-19 in pregnancy • Postpartum hemorrhage • Placenta: Separation and complications • Placenta and cord: complications • Rh incompatibility • Twin pregnancy • Molar pregnancy and gestational trophoblastic disease • Antepartum Hemorrhage • Pregnancy induced hypertension • Diabetes in pregnancy • Intrauterine growth restriction • Medical illness complicating pregnancy • Parturition introduction • Basic definitions, cardinal movements, ECV • Fetal skull, maternal pelvis, important dimensions • Malpositions, malpresentations • Basics of instrumental delivery, methods of labor induction • Episiotomy • Puerperium • Cesarean section • Infection in pregnancy

		- Vomiting in pregnancy Ectopic pregnancy Abortions - Induced abortions (MTP)	
	Drugs Used in Obstetrics and Gynaecology	Drugs used in obstetrics and gynecology	
	Instruments	Instruments in gynecology and obstetrics	
Forensic Medicine	Forensic Traumatology	- Mechanical Injuries - Regional Injuries-1 - Regional Injuries-2 - Forensic Ballistics - Blast Injuries - Thermal Injuries-1 - Thermal Injuries-2 - Explosion Injuries and - SCALD - Electrical Injuries - Cold Injury - Heat Artefacts - Transportation Injuries - Torture Method	
	Indian Legal System & Medical Jurisprudence	- Indian Legal System- Court Procedures - Legal Sections - Medical Jurisprudence- Part 1 - Medical Jurisprudence- Part 2 - Medical Certification of cause of Death	

	Violent asphyxia deaths	• Asphyxial Deaths Hanging and Strangulation • Asphyxial Deaths Suffocation • Asphyxial Deaths Drowning
	Forensic Thanatology & Forensic Identity	• Postmortem Techniques • Thanatology • Human Identification-1 • Human Identification-2 • Human Identification-3
	Sexual Jurisprudence	• Sexual offences • Impotency, Virginity, Pregnancy and Abortion • Infant Death • Trace Evidences • Battered Baby Syndrome
	Forensic Toxicology	• Toxicology Introduction • Diagnosis of poisoning in case of Living • Diagnosis of poisoning in case of Dead • General guidelines in the management of a case of poisoning • Corrosives • Metallic Poisons • Non-metallic Irritants • Animal Irritants • Plant Irritants • Cerebral Poisons • Delirients • Cardiac Poisons • Spinal Poisons • Asphyxiants

Pediatrics	Starvation Deaths	Starvation Deaths
	Forensic Psychiatry	Forensic Psychiatry
	Growth	- Assessment of growth and growth charts - Normal Anthropometric parameters - Short stature and tall stature - Abnormalities of head size and shape - Normal and abnormal dentition
	Normal Development	- Important motor milestones - Social and language milestones - Developmental implications of important milestones
	Developmental and Behavioral Disorders	- Abnormalities of development - Behavioral disorders in children
	Puberty and Adolescence	Puberty and adolescence
	Neonatology	- Important techniques and preterm and post term neonates - Primitive neonatal reflexes and conditions seen in neonates and requiring treatment - Neonatal resuscitation - IUGR and feeding of preterm neonate - Neonatal sepsis - Neonatal hypothermia - Neonatal hypoglycemia - Perinatal asphyxia - Important scores in neonates

		- Erythroblastosis fetalis - Latest updates in neonatology	
	Nutrition and Malnutrition	- Breast milk and breastfeeding - Micronutrients in health and disease - Malnutrition	
	Fluid and Electrolyte Disturbances	- Body composition and acid base balance - Disorders of sodium and potassium - IV fluids in health and disease	
	Genetics and Genetic Disorders	- Types of genetic disorders - Important genetic syndromes	
	Inborn Error of Metabolism	- Disorders of carbohydrate metabolism - Disorders of Amino acid metabolism - Lysosomal storage disease	
	Diseases of Immune System	- Primary immunodeficiency - Vasculitic disorders in children	
	Infectious Diseases	- Important viral diseases in children - Covid-19 in children - Important bacterial diseases in children - Congenital infection	
	Immunization	- Immunization - general concepts and special situations - Individual vaccines	

		• Tetralogy of fallot • Rheumatic heart disease • Other congenital heart diseases	
	Pediatric Hematology and Oncology	• Important hematological disorders in children • Important bleeding & coagulation disorders in children • Hematological malignancies in children • Tumors of infancy and childhood	
	Pediatric Gastroenterology	• Disorders of gastrointestinal system including diarrhea • Liver disorders in children	
	Pediatric Respiratory Disorders	• Normal structure and function of kidney in children • Acute and chronic kidney diseases • Congenital abnormalities of genitourinary tract • Nephritic and nephrotic syndrome • Obstructive and infective disorders of urinary tract • Renal tubular disorders	
	Pediatric Neurology	• Congenital CNS malformations and hydrocephalus • Seizures in children • Disorders with CNS involvement and brain death	
	Musculoskeletal disorders in children	• Disorders of muscles in children • Rickets • Important disorders involving bones	

		- Adrenal disorders - Disorders of puberty - Disorders of sexual development - Type-1 Diabetes mellitus and obesity in children
	Common Childhood Poisonings	Common childhood poisonings
		- Orogastric feeding tube insertion in a neonate - How to use radiant warmer for a neonate - Self inflating bag and mask for neonatal resuscitation - Identification of preterm vs term neonate
Surgery	Clinical Essentials	- Steps of hand washing before entering a neonatal intensive care unit (NICU) - Different types of seizures seen in children - Gower sign - Setting sun sign - Sturge weber syndrome - Intravenous cannula and its insertion in neonates and children - Phototherapy for neonatal jaundice
	Endocrine Surgery	- Breast part 1 - Breast part 2 - Thyroid 1 - Thyroid 2 - Parathyroid and adrenal gland
	Hepatobiliary Pancreatic Surgery	- Liver Part - 1 - Liver Part - 2 - Portal hypertension - Gallbladder

		• Pancreas
	Gastrointestinal Surgery	• Esophagus • Stomach and Duodenum • Peritoneum • Intestinal obstruction • Small intestine • Large intestine • Ileostomy and Colostomy • Inflammatory bowel disease part 1 • Inflammatory bowel disease part 2 • Vermiform appendix • Rectum and anal canal • Hernia and abdominal wall 1 • Hernia and abdominal wall part 2 • Spleen
	Urology	• Kidney and Ureter Part - 1 • Kidney and Ureter Part - 2 • Kidney and Ureter Part - 3 • Urinary bladder • Prostate and seminal vesicles • Urethra and penis • Testis and scrotum part - 1 • Testis and scrotum part - 2
	Cardiothoracic vascular surgery	• Arterial disorders part 1 • Arterial disorders part 2 • Venous disorders • Lymphatic system • Thorax and mediastinum part 1

	Plastic Surgery	• Burns • Plastic surgery and skin lesions • Wound healing tissue repair and scar
	Neurosurgery	• Cerebrovascular diseases • CNS tumor
	Head and Neck	• Oral cavity • Salivary glands • Neck • Facial injuries and abnormalities
	Oncology	• Oncology
	Others	• Trauma ATLS protocol • Nutrition • Pediatric surgery part - I • Pediatric surgery part - II • Head injury • Neck and thoracic injuries • Abdominal trauma • Transplantation Part 1 • Transplantation Part 2 • Robotics, laparoscopy and bariatric surgery • Sutures and anastomoses • Shock • General surgery • Tubes, catheters and drains • Instruments Part 1 • Instruments Part 2

		- Hernia - Modified radical mastectomy
Medicine	Cardiology	- Mitral valve prolapse - Percutaneous coronary intervention - Heart sounds 1 - Heart sounds 2 - Heart sounds 3 - Mitral valve prolapse - Mitral regurgitation - Aortic stenosis - Aortic regurgitation - Tricuspid stenosis - Tricuspid regurgitation and pulmonic stenosis and regurgitation - Murmurs - Cardiomyopathies - Takotsubo cardiomyopathies and brugada syndrome - Rheumatic heart disease - Infective endocarditis - ECG and arrhythmias part 1 - ECG and arrhythmias part 2 - Multifocal atrial tachycardia - ECG changes in hypokalemia & hyperkalemia - Acute coronary syndrome part 1 - Acute coronary syndrome part 2 - Symptomatic bradycardia with pulse - Congenital heart disease - Metabolic-syndrome-X and syndrome-Z - Hypertension - Disease of pericardium

	Emergency Medicine	• Basic cardiac life support • Pulseless electrical activity • Advanced cardiac life support • Mechanical ventilation • Massive transfusion protocol • ARDS • Snake bite • AHA 2020 update on CPR guidelines • High altitude pulmonary edema
	Endocrinology	• Pancreatic neuroendocrine tumors • Diabetes mellitus - 1 • Diabetes mellitus - 2 • Diabetic ketoacidosis and hyperosmolar coma • Disorders of parathyroid gland • Disorders of adrenal gland • Cushing syndrome • Diseases of thyroid • Diseases of anterior pituitary • Multiple endocrine neoplasia
	Nephrology / Kidney Disease	• Electrolyte imbalances • Bartter syndrome, Gitelman syndrome, Liddle syndrome and comparison with SIADH • Ciliopathies/Chronic tubulointerstitial disorders • Polycystic kidney disease • Thrombotic Thrombocytopenic purpura • Kidney urine analysis • Acute kidney injury • Chronic kidney disease • Diabetic nephropathy

		• Nephrotic and nephritic syndrome • Renal artery stenosis
	GIT	• Bleeding from the gut • Peptic ulcer disease • Zollinger Ellison Syndrome • Malabsorption Syndrome • Inflammatory Bowel Syndrome • Irritable Bowel Syndrome
	Hematology	• Chronic Lymphocytic Leukemia • Chronic Myeloid Leukemia • Acute Myeloblastic Leukemia • Acute Lymphoblastic Leukemia • Multiple Myeloma • Blood components • Blood transfusion complications • Hodgkins and non-hodgkin's lymphoma • Thalassemia • Sickle cell disease, G-6PD deficiency and other hemolytic anemias • Sideroblastic anemia • Platelet disorders
	Neurology	• Basics of middle cerebral artery and cranial nerve arrangement • Mechanical thrombectomy • Stroke • Transient ischemic attack and stroke interventions • Intraparenchymal hemorrhage and other CNS bleeds • Subarachnoid hemorrhage

		• Raised ICP and brain death • Intracranial space occupying lesion • Meningitis part 1 • Meningitis part 2 • CNS infections in AIDS positive patients • Parkinsonism and parkinson's disease • Myasthenia Gravis • Guillain Barre syndrome • Alzheimer disease • Multiple sclerosis • Neuromyelitis optica • Amyotrophic lateral sclerosis • Syringomyelia and conus medullaris syndrome • Channelopathies
